

SMART TIG 200 P AC/DC

TIG (AC/DC) PROCESS WELDING INVERTER
APPLIANCES.

Ref.22300200TACDC

Date: 06/11/2015

Code: FT-22300200TACDC

Revision: V0

Page: 1/1

GENERAL CHARACTERISTICS

Description:

Single-phase appliance with inverter technology by means of IGBT transistors for carrying out TIG AC/DC welding process. Auxiliary function of coated electrode MMA welding.

Use:

Professional TIG AC welding processes for aluminium, magnesium and their alloys. TIG DC welding of mild steels, stainless steels and copper. Application examples: Aircraft construction, petrochemical plants, food industry, shipbuilding.

Electricity supply:

1 Ph 230 V; 50/60 Hz. ±15 %.

Main advantages:

- Contactless TIG AC/DC arcing system (HF).
- Automatic stabilisation system in TIG AC mode (without HF)
- Pulsed TIG AC/DC mode.
- Control of digital cycle variables.
- Control of gas, adjustable pre-gas and post-gas parameters.
- 2T/4T pulse modes
- Electrode welding.

TECHNICAL CHARACTERISTICS		Smart Tig 200P AC/DC Ref. 22300200TACDC
Power supply voltage U_1 (50/60 Hz)		1 Ph. 230 V
Maximum input intensity $I_{1\max}$		30 A
Effective input intensity $I_{1\text{eff}}$		16 A (230 V)
Maximum/effective power (230 V)		6.9 KVA / 3.7 KVA
TIG AC/DC	Open Circuit Voltage U_{20}	60 V
	Maximum welding intensity $I_{2\max}$	200 A/25 %
	Welding intensity rating $I_{2\text{100\%}}$	100 A/100%
	AC Frequency	20–250 Hz
MMA	Open Circuit Voltage U_{20}	60 V
	Maximum welding intensity $I_{2\max}$	160 A/30 %
	Welding intensity rating $I_{2\text{100\%}}$	85 A/100%
Remote control		OPCIONAL
WIDTH x HEIGHT x LENGTH (mm)		165x328x439x
Weight		7.18 Kg.
