

**Handy Auto**

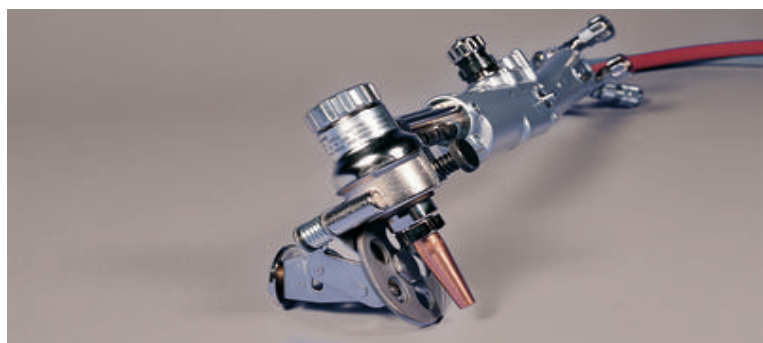

## Portable hand cutting torch with integrated drive system

The Handy Auto is a portable hand held gas cutting torch with an integrated drive system. This ensures highest cut quality in vertical, circular and shape cutting as well as beveling.

Besides cutting of flat surfaces it is also possible to perform curved contours on vertical surfaces like H-beams, pipes and bended plates.

Thanks to the low weight of 2,7 kg only Handy Auto can be used as simple as an ordinary hand cutting torch.

- Easy to operate
- Outstanding quality of cut surfaces
- Allows cutting in any direction
- High accuracy and efficiency
- Simple and fast accessory replacement

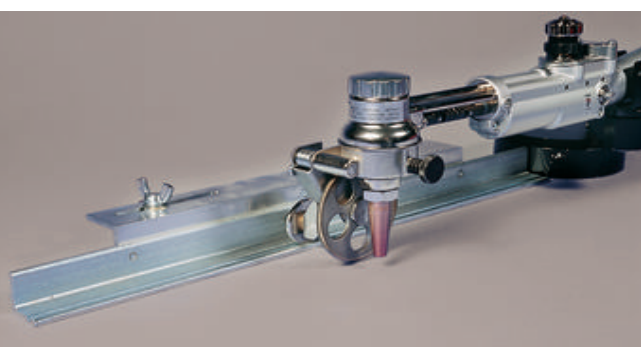

### Handy Auto

Cutting thickness	3-30 mm
Cutting speed	200-700 mm /min
Type of drive	Transistor control /friction drive
Power supply	230 V AC /12 V DC
Total length	500 mm
Type of gas	Acetylene, propane, natural gas and mapp gas
Weight	2,7 kg

### Scope of delivery:

- Portable cutting machine Handy Auto
- Guide wheel for straight cutting
- Guide wheel for bevel cutting
- Circle cutting device (30-120 mm Ø)
- Guide arm
- Cutting nozzles (5-30 mm material thickness)
- Main lead (5 m)
- Tool set
- Operation instructions
- Transport box

*Your cutting needs – achieved.*
